MEET CORVO™ EKG

A get-to-know-you guide

Soon, you and I will be inseparable. Some people say the bond between brewer and kettle is even stronger than the bond between mother and child. (And by some people, I mean I said that once. So it must be true!)

Anyway, I'm looking forward to brewing great tea and coffee together for years to come. In the meantime, check out this guide to help you get started.

A steamy story
awaits...

LET'S GET THE BREWING PARTY STARTED

With Corvo EKG you can:

Heat your water with to-the-degree temperature precision.

After your water is heated, the built-in Brew Stopwatch can time your brew for the perfect cup of tea or coffee.

Maintain your desired temperature for 60 minutes.

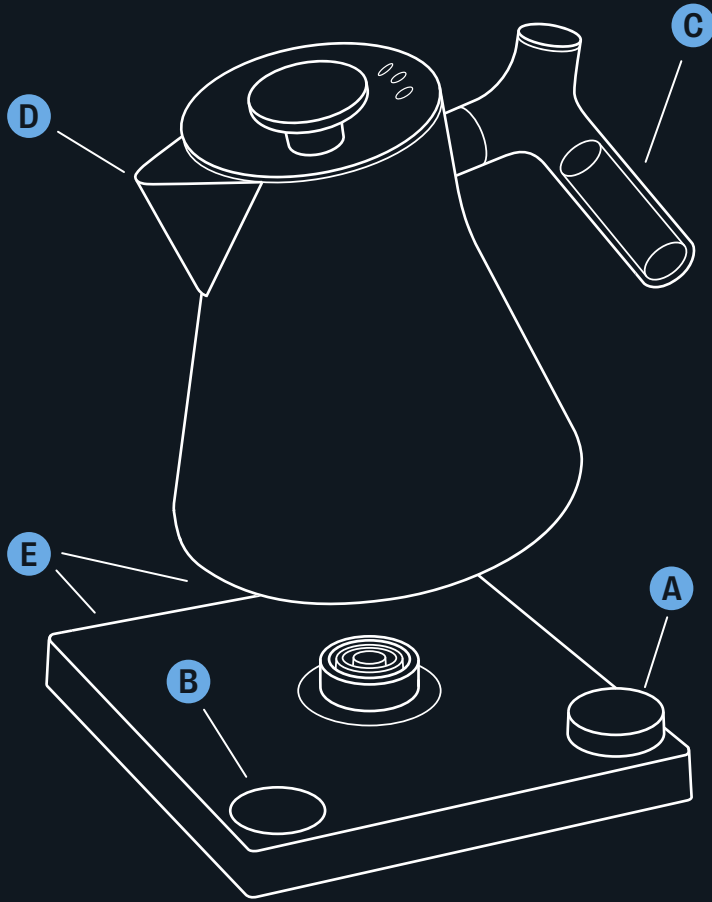

Pour with finesse thanks to our signature spout.

Put the calculator away. No more converting to your preferred setting.

ALL THE RIGHT PARTS

A DIAL One quick press to turn the kettle on or off. One long press to start the Brew Stopwatch. Turn to select the temperature.

B DISPLAY See how things are heating up on the LCD screen.

C HANDLE Counterbalanced for easy pouring. Ergonomic for getting a grip.

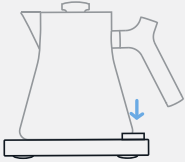

D SIGNATURE POUR SPOUT Corvo EKG's spout is shaped for a controlled, no-spill pour. No glugging or splashing here.

E HOLD MODE AND TEMP Use the rear panel toggles to choose hold mode and Fahrenheit/Celsius.

FEATURE GUIDE

Start here to embark on your Corvo EKG journey

①

TURN ON

Push the dial to turn on your kettle.

②

HOLD AND F/C

Use the back toggles to choose temperature and hold settings.

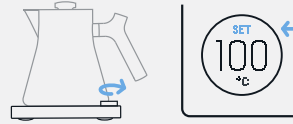

③

HOLD MODE

Hold mode maintains your set temperature for 60 minutes. If hold mode is off, your kettle will reach set temperature, stay there for 5 minutes, then stop heating and go into standby for 15 minutes before turning off. When you have toggled hold mode on, the screen will flash "HOLD ON." Screen will show "HOLD" when kettle is holding your set temperature.

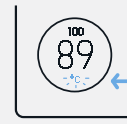

④

SET TEMPERATURE

Twist the dial to set desired temperature. Screen will show "SET" when temperature is being set.

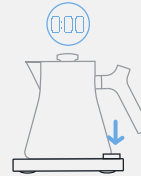

⑤

HEATING

When the F/C is blinking, the kettle is heating. The top number on your screen is your set temperature, and the bottom is your current temperature.

⑥

START/STOP BREW STOPWATCH

To start or stop the Brew Stopwatch, hold down the dial for 2 seconds. Push dial again to stop the stopwatch and return to main screen.

⑦

SET TEMP. REACHED

Once your SET temperature is reached, your kettle will steadily maintain that temperature thanks to the smart PID controller.

⑧

TURN OFF

Push the dial to turn off kettle.
